

The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are at the top left, some are scattered in the middle, and a large, prominent one is on the right side. The droplets have highlights and shadows, giving them a three-dimensional appearance.

WAMAS Count Down

~~June 30, 2015 Launch Date~~

We're there

Remaining Sprint...

★ CTS Security Review – DES to DOR backend data QA/QC processing requires open port

★ WAMAS QA/QC Mapping Tool - authorized users editing tool for improving address point location(s)

★ County Authoritative Address Loading Scripts – individual, custom county ETL procedures for on-going improvement to the MAF

★ Bulk Address File Processing – provide mechanism for agencies to load mass address lists (500K+) for standardization, geocoding & geoloc attributing.

Partnering for Addresses

1 Why

911

Needs every address every day
is most attuned to the local geography

2 How

Federal uses, including census, should fully leverage and support partnerships to:

- Eliminate redundancy
- Harness local knowledge
- Build capacity

3 What:

Model for Federal/
National Action

Funding
Best Practices
Data Specs
Feedback

50 States
3100 Counties
19,000 Local Govs

WAMAS Development Effort

Locating people and places in Washington

A history of inconsistent results in searching for and locating addresses in Washington has resulted in bad press and even legal action over the last decade. Because of this several agencies have been working collaboratively to...

- Improve existing tools;
- Design and implement a process that brings a consistent and unified approach to addressing;
- Return consistent results; and
- Allow for corrections that feed back to the master file and to the rest of the service users.

This site is designed to provide information and links to WAMAS shared web services. These services can be consumed from within a web browser, a mainframe, desktop or server application. The suite of services that have been developed include tools that...

- Correct an address to USPS standard format;
- Add coordinates to an address so it can be displayed and viewed on a map; and
- Locate an address in the correct geographic area like county, voting and taxing districts and many other important boundary jurisdictions.

NEW & UPDATED PROCESS TO ACCESS API'S

- **FOR THOSE WITH ACCESS...**

- I WILL BE CONTACTING ALL THE INDIVIDUALS WHO HAVE ACCESS AND ASKING THEM TO FILL IN THE THREE FORMS SO THEY CAN CONTINUE TO ACCESS THESE SERVICES.

- **FOR THOSE REQUESTING ACCESS...**

- I WILL FORWARD THE THREE FORMS FOR THEIR COMPLETION BEFORE THEY WILL BE GRANTED ACCESS

- **FOR AGENCY CONTRACTORS...**

- I WILL FORWARD THEM BACK TO THE AGENCY FOR PROCESSING
- I NEED A BETTER WAY TO OVERSEE THEIR CONNECTION TO THESE SERVICES AND WANT TO HEAR SOME IDEAS TO BETTER REGULATE THESE CONNECTIONS

TERMS OF SERVICE AND BUSINESS USE CASE

- THIS IS THE BIG CHANGE... SO WHO SIGNS FOR YOUR AGENCY? YOU OR THE USER?
